Quantstamp is hiring Auditing Engineers

Quantstamp (https://quantstamp.com/) is the leading web3 security company. Working for Quantstamp is akin to working for an internet company in 1997. In 1997, we didn't know what the internet would look like in 10 years, but those involved knew it was going to have a huge impact on the future.

Competitive Compensation Packages

We offer highly competitive compensation packages on par with big tech, in addition to equity, performance bonuses, and employee referral bonuses.

Respecting the Work / Life Balance

We understand that employee burnout interferes with creativity, effectiveness, and quality of life.

- 5 - 6 vacation weeks per year for full time employees
- Paid family leave
- Paid gym memberships or online workout subscriptions of your choice

Remote 1st Company

Working for Quantstamp means that you can work from anywhere in the globe. Outside of certain meetings, employees can work whenever they prefer from wherever they want.

Other Perks

- Quarterly retreats in exotic locations
- Attendance at blockchain and security conferences
- Professional technical training and courses

Culture

- We don't like red tape: we limit needless bureaucracy

- Heavy collaboration and knowledge sharing keeps us at the state-of-the-art
- Encourage physical and mental health
- We are passionate about security and we do not compromise on our security assessments

Open Positions

We have three levels for Auditing Engineers (I, II, and III) which are tailored to candidates' varying degrees of knowledge and experience. For the job descriptions, please check our career page at https://quantstamp.com/careers. Also, the YouTube videos will help you understand What It's like Working at Quantstamp

Level I is where a lot of people start with us. This level is for candidates who may be new to blockchain as a whole, or familiar with blockchain but not with blockchain security. For this Level, you are not required to have any Solidity knowledge or experience in blockchain. If you join us as a Level I, we will mentor and teach you the foundation and skills necessary to be an effective auditor.

Level II is for people who are proficient with Solidity, are familiar with web2 and web3 security fundamentals, but haven't worked in a smart contract auditing capacity before.

And Level III is for those who have experience auditing smart contracts, are familiar with high-level web3 security concepts, and can hit the ground running.

If you are interested in the position, please email your CV to kanghun@quantstamp.com
